

TRIPLE S SSS MicroPower Pocket Mop

New & Improved!

Individual Date Coding allows you to track product life cycle, and ensure ROI

New polyester backing heat set at 400° to prevent shrinking, allowing mops to properly fit on frames.

Higher strand count and densely knit weave provides improved soil removal and moisture retention.

Improved Soil Removal - Cleaner Facilities - Better Outcomes

Tightly twisted heat set microfiber yarn eliminates fraying increasing product longevity.

Features and Benefits

- No touch removal makes changing mops quick and easy, helping to reduce cross contamination from one patient area to another.
- Offers high moisture capacity to cover more area. Picks up 3x soil and moisture over standard velcro style microfiber mops.
- Used in larger jobs or where heavier soiling is common (rest rooms and classrooms).
- Can be used in wet or dry applications.
- Variety of colors offers various color coding options.

Size	Item #	Color
